Content For BeakPeek User Manual

Home Page

Search Bar:

Use the search bar to find a specific bird by typing in what you're looking for. You can search by Common name, Species name or Genus!

Quiz:

Expand your knowledge on South African birds! Click start Quiz and then match the bird name to the shown picture to earn experience points!

Tracked Achievements:

Star your goal by clicking on the star symbol and then the achievements and their progress will be displayed here! You can also lick on "Tracked Achievements" to see all possible achievements.

Birds You Want To See:

You can star a bird by clicking on the star icon when you search for it using the search bar. They will then be saved here for easy access to their heat maps and information. These birds are also downloaded so you can see all their information on the go!

Map

Map Colours:

Green indicates a high likely hood to see a bird in this area (75%+). Yellow indicates a medium chance to see the specific bird (25% - 75%). Red shows that you have a low chance to sight that bird in that area (1-25%). No colour means you have no chance of finding that bird in that area.

Pentad Definition:

The squares you see on the map are called pentads! They are 10km x 10km squares that define the borders of the data that shows you where all the different birds in South Africa can be seen.

Profile Page

Here you can change your username and other personal information by tapping on the text boxes.

Settings like dark mode can be changed by tapping the wheel in the top right corner.

Sightings / Life list

All birds that you have saved to your life list will appear here and you can easily access all their information by tapping on them. You can return to the home menu by tapping on the arrow in the top left corner.
